

**Cleanup**

*Made in Japan*

# *SINK of Cleanup Corporation*

*The Japan Stainless Steel Sink with upgraded cleaning function is a must-have item in your kitchen!*

*Cleanup Stainless Steel Sink resists scratches and dirt.*

*Stream Flow Sink  
Super Silent Sink*

*A rail that helps keep the sink clean*

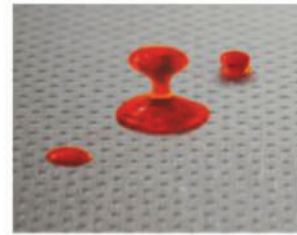

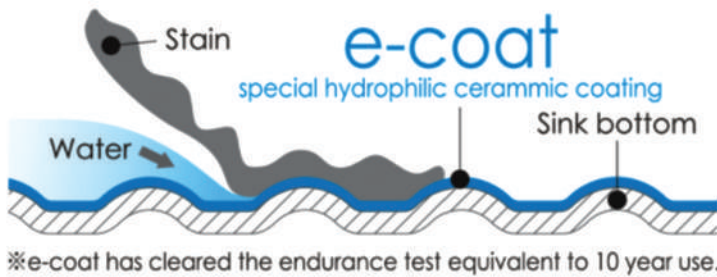

*February - December 2022*

## e-Coat Technology e-coat

The special hydrophilic ceramic coating "e-coat" forces water to work its way underneath the grease and grimes so everything washes away easily.

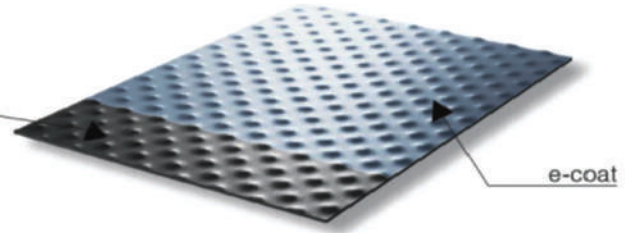

e-coat area of Sink

## Embossing Technology

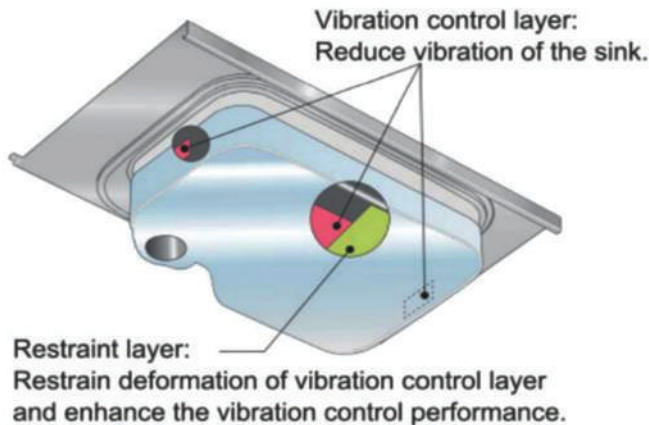

By applying emboss processing, the surface where dishes and sink contact have reduced. This enabled the stainless and inconspicuous scratch feature.

e-coated Special embossed finish

## Silent Technology

Vibration control structure is used not only at the bottom back of the sink but also the sides.

Phone level	70dB	
In noisy office	60dB	Conventional Sink
Regular conversation	50dB	
In regular office	40dB	Stream Flow Sink
In library	30dB	
Pendulum of wall clock		
Whispering		

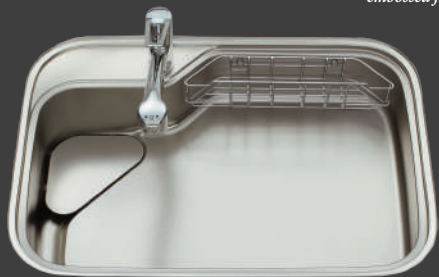

## Stream Flow Sink Technology

Water used during cooking will capture garbage and stains and flow towards the stream flow. Garbage flowing into the stream flow will be pushed away with water and into the drainage.
